Professional Summary

Full Stack Developer with 1.5+ years of experience building scalable SaaS platforms and CRM systems using Next.js, React.js, TypeScript, Node.js, and PostgreSQL. Experienced in WhatsApp Business API (Meta) integrations, AI-powered features, RESTful APIs, and third-party integrations including Stripe, Cryptomus, Tenetos, and LeaseWeb. Proven ability to optimize backend architecture, automate workflows, and deliver production-ready solutions in agile environments.

Experience

Sogofy Biz Tech Private Limited   July 2024 – Present
Full Stack Developer   *Tamil Nadu, India (Hybrid)*

CRM & WhatsApp Campaign Automation Platform | *Product Development*
- Built CRM modules for WhatsApp campaign automation using React.js, Node.js, and PostgreSQL.
- Integrated Meta WhatsApp Business API for template management, conversation tracking, and bulk messaging workflows.
- Implemented webhook-based real-time message processing for campaign delivery and response tracking.
- Designed backend services for conversation history, campaign analytics, and message delivery management.

AI-Powered Hiring & Candidate Evaluation Platform | *Product Feature Development*
- Implemented AI-powered video-to-transcript processing and automated candidate evaluation workflows.
- Built dynamic PDF generation for candidate profile exports to streamline recruitment workflows.
- Developed full-stack modules for candidate data management and recruiter dashboards.

Server Management & Hosting Automation Platform | *Full Stack Development*
- Implemented server provisioning and management workflows using Next.js, TypeScript, Node.js, and PostgreSQL.
- Integrated Tenetos and LeaseWeb APIs for automated and manual server allocation and monitoring.
- Built order management and billing workflows with automated invoice and email notifications.
- Integrated Stripe and Cryptomus gateways for secure server purchase and subscription processing.
- Developed backend automation to monitor server status and synchronize resources across providers.

Project

Booking.com Clone | *React, Redux, Node.js, MongoDB, Chakra UI*   Live Demo
- Built a full-stack hotel and flight booking platform clone with authentication, search, listings, and payment workflows.
- Implemented hotel, flight, and car rental booking modules with admin dashboard and analytics features.
- Collaborated in a 4-member team to design responsive UI and manage end-to-end booking flows.

Education

Birla Institute of Technology and Science (BITS), Pilani   Aug 2023 – Jul 2026
Bachelor of Science (B.Sc.) in Computer Science   *Pilani, Rajasthan*

Technical Skills

Programming Languages: JavaScript, TypeScript, SQL
Frontend: Next.js, React.js, HTML5, CSS3, Tailwind CSS, Material UI, Chakra UI, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, Webhooks, JWT Authentication, OAuth 2.0
Databases: PostgreSQL, MongoDB, MySQL
APIs & Integrations: WhatsApp Business API (Meta), OpenAI API, Stripe, Cryptomus, Google OAuth, LinkedIn OAuth, GitHub SSO

Certifications & Achievements

Full Stack Web Development Program (Full Time) — Masai School, Bengaluru, Karnataka   Aug 2022 – Jul 2023
