Profile Summary

Software Engineer | Full Stack Developer with 2 years of experience building and scaling SaaS platforms and CRM systems using the **MERN stack** and Next.js. Skilled in backend architecture, API integrations, and frontend performance optimization. Experienced in delivering production-ready, end-to-end features in Agile environments, with a strong focus on scalability, automation, and seamless user experiences.

Skills

- **Languages & Frameworks:** JavaScript, TypeScript, SQL, HTML5, CSS3, Redux, Express.js
- **Frontend:** Next.js, React.js, Tailwind CSS, Material UI, Chakra UI, Responsive Web Design
- **Backend & Databases:** Node.js, Express.js, PostgreSQL, MongoDB, RESTful APIs, Webhooks
- **Cloud & DevOps:** GitHub Actions, JWT Authentication, OAuth 2.0, Agile/Scrum, Postman, CI/CD
- **APIs & Integrations:** WhatsApp Business API (Meta), OpenAI API, Stripe, Cryptomus, Tenetos, LeaseWeb
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Attention to Detail, Adaptability

Work Experience

Sogofy Biz Tech Private Limited <i>Software Engineer</i>	July 2024 – Present <i>Tamil Nadu, India (Hybrid)</i>
CRM & WhatsApp Campaign Automation Platform <i>Product Development</i> • Built CRM modules for a WhatsApp campaign automation platform using React.js, Node.js, and PostgreSQL. • Integrated the Meta WhatsApp Business API for template management, bulk messaging, and real-time webhook-based conversation tracking.	
AI-Powered Hiring & Candidate Evaluation Platform <i>Product Feature Development</i> • Built full-stack modules for candidate data management, skill tracking, and recruiter dashboards. • Implemented video-to-transcript processing, automated candidate evaluation, and dynamic PDF generation for profile exports.	
Server Management & Hosting Automation Platform <i>Full Stack Development</i> • Built server provisioning workflows using Next.js, TypeScript, Node.js, and PostgreSQL with Tenetos and LeaseWeb API integrations. • Integrated Stripe and Cryptomus payment gateways for server purchases and subscription processing. • Built order management and billing workflows with automated invoice generation and email notifications.	

Project Experience

Server Management & Hosting Automation Platform <i>Software Engineer</i>	July 2024 – Present <i>Sogofy Biz Tech Private Limited</i>
• Led end-to-end development of a multi-provider server management platform – from architecture design to production deployment. • Built server listing, manual allocation, and auto-allocation workflows by integrating the Tenetos and LeaseWeb APIs for real-time server provisioning. • Implemented role-based access management (RBAC) for admin and user roles across server listing, allocation, and order flows. • Integrated Stripe and Cryptomus payment gateways, supporting fiat and cryptocurrency payments for purchases and subscription billing.	

Education

Birla Institute of Technology and Science (BITS), Pilani <i>Bachelor of Science (B.Sc.) in Computer Science (Distance)</i>	Aug 2023 – Jul 2026 <i>Pilani, Rajasthan</i>
Masai School <i>Full Stack Web Development Program (Full Time)</i>	Aug 2022 – Jul 2023 <i>Bengaluru, Karnataka</i>
